Professional Summary

Multilingual cybersecurity and intelligence professional with over 10 years of operational experience in reconnaissance, threat detection, and security operations. Successfully transitioning into digital defense by combining high-stakes incident handling experience with technical proficiency in SIEM, Python, and SQL. Seeking an entry-level SOC Analyst or Threat Intelligence role where analytical rigor and disciplined reporting deliver measurable security outcomes.

Core Technical Skills

- Security Operations: SIEM basics (Splunk/ELK), Incident Triage, and Threat Modeling.
- Frameworks & Standards: Familiarity with MITRE ATT&CK, NIST CSF, and Vulnerability Awareness.
- Systems & Networking: Linux System Administration, Network Protocols (TCP/IP), and SQL for log queries.
- Automation: Python scripting for security automation and log parsing.
- Operational Security: OPSEC practices, Secure Communications, and Intelligence Reporting.

Cybersecurity Projects

Security Audit & Risk Assessment (Google Capstone)

- Performed a comprehensive internal security audit identifying misconfigurations and access control vulnerabilities.
- Developed a remediation strategy aligned with the NIST Cybersecurity Framework.

Python Log Automation

- Developed a Python script to automate "allow list" updates for access control, reducing manual entry errors.
- Implemented logic to parse and filter large datasets to identify unauthorized access attempts.

SQL Incident Investigation

- Utilized SQL to query database logs and identify failed login attempts outside of standard business hours.
- Analyzed patterns to differentiate between user error and potential brute-force attacks.

Professional Experience

Private Military Contractor (PMC) | International Security Firms | 2011 - 2018

- Threat Detection: Performed real-time threat triage and surveillance in high-risk maritime environments to identify indicators of compromise.
- Incident Response: Led small teams in responding to security incidents and supported mission planning through structured reporting.
- Operational Security: Enforced strict OPSEC protocols and managed secure communications for international security operations.

Military Service | Ukrainian Armed Forces

- Intelligence & Reconnaissance: Conducted reconnaissance and intelligence-gathering operations with a focus on disciplined observation.
- Secure Communications: Managed encrypted communication channels and produced high-fidelity intelligence reports for senior leadership.

Education & Certifications

Certifications

- Google Cybersecurity Professional Certificate | 2024/2025
- Network Technologies & System Administration | IT Academy STEP | 2007
